

PROJECT MEETING 3 – AJACCIO

17th - 20th June 2010

LEARNER'S DIARY by Lucie Gižová

Meeting in Ajaccio referred to the issue of “Types of self-employment, founder personalities”. Several workshops were carried out with focus on personal preconditions, entrepreneurial skills and professional competences needed when opening a business.

At the beginning, hosting partners made a presentation on situation of migrants and company founders in Corsica. Some very successful stories were presented to show our Corsican partner's best practice. Then, as the result of previous meeting, brief résumé of the best practices in each country was presented.

After these two presentations, meeting participants divided into two groups – a steering committee which is in charge of the administrative part of the project, and group of learners. Learners discussed the topics of personal preconditions and entrepreneurial skills and, as the result of the discussion they prepared a short résumé to be presented at the next meeting.

Meeting of the steering committee took place in a separate room. We went through the work programme, planned activities and we checked if anything is missing. Some decisions were made in terms of the second year of realization of our project.
