

LEARNER'S DIARY FROM AJACCIO - CORSICA

IMMIGRANTS BUSINESS PLAN (LEONARDO)

Ajaccio - FRANCE – June 2010

Arriving on Thursday, I was ready to take part to this new meeting.

I was happy to meet again all my partners from Greece, Germany, Czech Republic, and France. I first thought we were to be a small group there but at the end it was not.

Many partners were there, happy and ready to work.

As always, some had done all the homework we were supposed to do, some came with it and finally we manage as always to get the information we needed on time.

The meeting for me is a turn in the project, maybe because after having taken time to learn from each others, we are now targeting to work on our guideline. It was of course impossible before but now I have had the impression, it was the right time. The partners from Corsica, had prepare some PowerPoint presentation in order to present some tools and method “coaches” are using, a real first step in our project.

This meeting was of course as well special, because of an interim report we have to prepare for the end of June. It was though the right moment to check what was ready or needed to be sent by partners. A very long steering committee has been necessary to discuss about these point.

As a resume, I would say, I am quite confident about what has been done, even if we all know that a Leonardo learning partnership do not allow to make huge things, it might be the right time next year to think about a bigger project to use the result of this and to create real tools.

I am expecting Brussels in October, this meeting will be, I am sure a very studios meeting...

Cédric
