

LEARNER'S DIARY FROM Cédric
IMMIGRANTS BUSINESS PLAN (LEONARDO)
Tubingen - Germany – 2 – 5 June 2011

Final Meeting

It was our last meeting, and as well a nice moment in the city of Tübingen.

First of all, we were all very happy to have finished our guideline, which now is in English. After almost two year of partnership, this is as well partners meeting themselves, but as well, colleagues and friends.

This process to learn from each other and to work well together is still good. We al realized that ones we are ready to work properly together, the project is finished; this is great but as well a pity.

During this meeting, we have checked what is still to be done. A course to organize, some information to send my organization to communicate about the project threw ITG extranet.

Instead of speaking a lot about IBP, here are some pictures about the different place we've been to.

Workshop, exchanges about franchising, meeting a Greek woman who have just created its own company (travel agency). This was ones more a very fruitful meeting and the new coordination team was very good.

Working with people from 7 organisations has been a real pleasure and once more a real thank to all of you for your curiosity, your commitment and your willingness to learn from eachothers.

Immigrant business plan is finished in a way, but I am as well very happy, to have new questions, new ideas about new project I could develop at national or transnational level. What is still to be done to help migrants to create their own business or activity, so many things, but this should be an onother adventure... and I am willing to work again in that direction.

Those projects are quite good to start working with new organization; I wish some of the call for proposals we have all worked for will be financed.

It is not only during the meetings we are really learning from each others... intercultural activities were as well very important ... to understand our differences, eating at 6.00 Pm or 10.00 Pm for instance.

What else, so many things still to be discovered or to be done. I really hope to start a new project soon...

A special thanks to Anerose from Team-Training who passed away last year, you are still in my thought and hurt. I have been really so happy to meet you.

Herzlichen Dank Annerose...
